<u>UNIVERSITY OF COLOMBO, SRI LANKA</u>

UNIVERSITY OF COLOMBO SCHOOL OF COMPUTING

BACHELOR OF SCIENCE IN COMPUTER SCIENCE

Academic Year 2018/2019 - Second Year Examination - Semester I - 2019

SCS 2205 – Computer Networks I

TWO (2) HOURS

To be completed by the candidate

Examination Index No:

Important Instructions to candidates:

- 1. The medium of instruction and questions is **English**.
- 2. If a page or a part of this question paper is not printed, please inform the supervisor immediately.
- 3. Note that questions appear on both sides of the paper. If a page is not printed, please inform the supervisor immediately.
- 4. Write your index number on each and every page of the question paper.
- 5. This paper has 4 questions and 14 pages.
- 6. Answer **ALL** questions. All questions carry equal marks (**25** marks).
- Any electronic device capable of storing and retrieving text including electronic dictionaries and mobile phones are not allowed.
- 8. Non-programmable calculators are allowed.

For Examiner's use only

3.

Examination	Index	No:	

(c). You have been asked to design and apply an IP addressing scheme for a network given below. The total IP address space given to you is 212.42.144.0/20.

LAN 1 Capacity	1500 Hosts
LAN 2 Capacity	800 Hosts
LAN 3 Capacity	250 Hosts

- Write down the network address, broadcast address and the correct subnet mask (i). in CIDR notation for LAN 1, LAN 2 and LAN3 in the table given below. Show your workings clearly in the space given in the answer box.
- Write down the number of unallocated IP address block(s) available after the above (ii). allocation, indicating their network addresses and the corresponding subnet masks in CIDR notation.

(ii). (iii).	The <i>header length</i> field of an IPv4 datagram contains the value 1110. Write down the size (in bytes) of the <i>Options</i> field of the above datagram. How does an IPv4 router block all incoming UDP traffic? Write down three (3) header fields in an IP datagram that will always change as it leaves a router, with IP Masquerading enabled, on its way towards the destination. [09 marks]
